

## **HDS Analytics and Payment Integrity Solutions**

Current NASP members can schedule a free solution demo for [Script Scan](#) or [Claim Scan](#) by visiting <https://hds-rx.com/contact-hds/>.

**Script Scan (for pharmacies):** Representing a new era in robust prescription analytics for pharmacies, Script Scan offers daily script-level insights into the performance and trends of your business. Accessible through a HITRUST e1 secured, web-based portal, Script Scan augments your current pharmacy analytics by leveraging over 40 rules-based algorithms and customized dashboards to isolate negative margin dispenses, understand financial trends at the drug or provider level, and streamline audit reconciliation timelines.

Leverage customized dashboards to understand:

- Department-Specific operational performance (AM, Sales, Ops, and Executive Mgt)
- Trend financial performance by pharmacy, drug, provider, region, and more
- Prescription-level detail including Script Volume, Revenue & Gross Margin
- Export functionality to PowerPoint & Excel

Utilize advanced analytics to streamline the post-pay adjudication review process with:

- 40+ rules-based algorithms (“scans”) designed to identify script-level reimbursement errors and compliance oversight
- Customized workflow queue to track, assign, and resolve script-level issues
- Detailed reasons and resolutions providing recommended course of action for each scan

Your pharmacy claims data, when you need it, and the way you want it. Optimize your pharmacy’s business performance with [Script Scan](#).

## **Claim Scan (for payers)**

Bridging the divide between payers and PBMs, Claim Scan ongoing monitoring provides third-party pharmacy claims validation ensuring your PBM's performance on 100% of claims. Leverage over 500 claim scanning algorithms, AI, and machine learning to review all of your plan’s pharmacy claims and highlight potential adjudication issues at every invoice. With over 65% of Claim Scan’s algorithms representing analytics beyond the scope of a traditional PBM audit, payers can get claim-level insights across six main categories:

1. Plan Design Errors
2. Savings Opportunities

3. Audit Review
4. Regulatory/Claim Fill Errors
5. Contract Administration Errors
6. Reimbursement Errors

Hold your PBMs accountable and drive added pharmacy benefit savings with Claim Scan ongoing monitoring. Click [here](#) for a detailed view of the differences between traditional PBM audits and Claim Scan.
